DETAILED ACTION

1. The election of Group 1, claims 1-13, with traverse is acknowledged. The traversal is based on the argument that a search of all of the inventions would not be an undue burden on the examiner. This is not found persuasive because the different methods and vaccine compositions require different searches of the prior art.

2. Claims 1-13 are under consideration.

Election/Restrictions

3. Upon further consideration, the methods of claims 1-13 require a further restriction requirement:

Claims 1-5 and 7-12 are generic to a plurality of disclosed patentably distinct species comprising an immunotherapeutic composition for effecting B cell depletion. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Art Unit: 1642

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the Office should be directed to Anne Holleran, Ph.D. whose telephone number is (703) 308-8892. Examiner Holleran can normally be reached Monday through Friday, 9:30 am to 2:30 pm.
